PROFESSIONAL SUMMARY

Fullstack Developer with strong expertise in backend development using Laravel and MySQL, complemented by solid frontend skills in React.js. Experienced in building clean REST APIs, role-based access systems, and well-structured databases. Brings added value through a background in Machine Learning, including a published IEEE research paper (CNN-based image classification) and 700+ hours of structured ML training from Bangkit Academy (avg. score 90+), enabling integration of intelligent, data-driven features into web applications. Graduated with a 3.90 GPA, committed to clean, maintainable code and continuous learning, including modern AI-assisted development workflows. Looking to contribute as a backend-focused full-stack developer in a fast-moving team.

TECHNICAL SKILL

- **Backend Development:** Laravel 12, REST API Development, MySQL, Database Design & Normalization, Role-Based Access Control (RBAC).
- **Frontend (Supporting):** Javascript and React.js (basic)
- **Tools:** Git, GitHub, Postman, Figma, VS Code
- **Additional Knowledge:** Python, TensorFlow (project-based), Machine Learning fundamentals

PROJECT AND EXPERIENCE

Freelance Web & Academic Projects | Self Employed (2025 - Present)

- Built 10+ REST API endpoints using Laravel 12 covering auth, RBAC, filtering, and pagination for real client projects.
- Designed and normalized 4–5 database schemas per project, ensuring data integrity and scalability.
- Integrated Decision Tree and Simple Additive Weighting (SAW) algorithms into backend logic for automated recommendation features.
- Developed backend APIs for AI image classification systems — handling uploads, TensorFlow inference results, and structured storage.
- Contributed backend integration to a React-based Dental Health Education Platform with secure CMS features.
- Used Git for version control and Postman for API testing across all deliverables.

Studi Independen Bersertifikat | PT Dicoding Academy Indonesia (2024)

Machine Learning Cohort

- Completed 700+ hours of structured training in Machine Learning and Deep Learning with an average score above 90.
- Built end-to-end machine learning pipelines, including data preprocessing, model training, evaluation, and deployment.
- Developed and optimized models using Python, Scikit-learn, and TensorFlow (including CNN models).
- Finished a 200-hour capstone project in a cross-functional team, delivering a ready-to-deploy ML solution integrated into a web environment.

Program Penguatan Kapasitas Organisasi Mahasiswa Pecinta Alam | Universitas Primakara (2023)

- Designed and developed a web-based information system for document management and cultural tourism mapping using laravel 10.
- Contributed to backend logic design, data normalization, and system deployment support.
- Coordinated with stakeholders to translate operational needs into functional system features.

EDUCATION

Sarjana Komputer Program Studi Sistem Informasi (2021 - 2025)

Universitas Primakara

- GPA 3.90/4.00
- Final Project: Efficient Convolutional Neural Network-Based Model for Balinese Dance Classification with Hyperparameter Optimization and Data Augmentation.
- Conference Publication (IEEE): An Efficient CNN-Based Model for Balinese Dance Classification with Hyperparameter Optimization. Published in: 2025 Sixteenth International Conference on Ubiquitous and Future Networks (ICUFN).
DOI: [10.1109/ICUFN65838.2025.11169987](https://doi.org/10.1109/ICUFN65838.2025.11169987) (July 2025).

ACHIEVEMENT

3rd Place – INVENTION UI/UX Competition, Udayana University (2023)

- Designed a smart plant care application concept integrating IoT and Machine Learning with a clean and modern UI

CERTIFICATION

- Belajar Data Analisis dengan Python - Dicoding Academy (2024)
- Machine Learning Specialization - Coursera (2024)
- Sertifikat Kompetensi Pengembangan Perangkat Lunak (Sistem Analis) - Badan Nasional Sertifikasi Profesi (2024)
- Certificate in Business Intelligent Associate - Logical Operation (2024)
